A Book, Written Chapter by Chapter

Noor Fatima

August 27, 2026

Abstract

This book demonstrates a chapter-and-part structure suited to a long academic manuscript: a title page, a short front-matter abstract, numbered chapters with epigraphs, and a resolved bibliography.

Contents

Abstract **iii**

Contents **iii**

1 Introduction **1**
1.1 Motivation 1
1.2 How This Template Is Organised 1

2 A Worked Chapter **3**
2.1 Chapter Epigraphs 3
2.2 Citing and Closing 3

Bibliography **5**

Chapter 1

Introduction

> The structure of a book is the argument made visible.
>
> — Anonymous

1.1 Motivation

A long manuscript benefits from a consistent skeleton — front matter, a numbered body, back matter — applied uniformly across chapters [Knuth, 1984].

1.2 How This Template Is Organised

Table 1.1 lists the three regions this starter uses and what each one is for.

Region	Purpose
Front matter	Title page, abstract, table of contents
Main matter	Numbered chapters and sections
Back matter	Bibliography

Table 1.1: Regions used by this starter.

Chapter 2

A Worked Chapter

> Detail is what separates a draft from a finished book.
>
> Anonymous

2.1 Chapter Epigraphs

Each chapter here opens with a short epigraph, set with the `epigraph` package, before its first section begins.

2.2 Citing and Closing

The bibliography below resolves the citation used throughout this document [Knuth, 1984].
