A focused thesis-defense presentation

FiBeamer theme starter

Your Name

A compact agenda

1. Question

2. Evidence

The question to resolve

Working hypothesis

A clearly stated intervention makes the result easier to evaluate.

- Define the baseline and the evaluation measure.
- Separate observed change from interpretation.
- End with the next experiment or decision.

A result in context

Measure	Baseline	After change
Handoff time	42 min	29 min
Repeat questions	11	7

Interpretation

The result is promising; validate it with a new sample before generalising.

Questions

Thank you.
