How to use this sheet

Fill each grid so that a value appears only once in every row, column, and sub-grid. The ‘multi-sudoku‘ package accepts familiar tabular syntax and supports grids larger than the usual 9 by 9 format.

Editing notes

Change the optional ‘size‘, ‘length‘, ‘fontsize‘, and ‘thickness‘ keys on an individual ‘sudoku‘ environment to make a worksheet or a large-format puzzle. Blank cells are left empty; clues are ordinary numbers.
