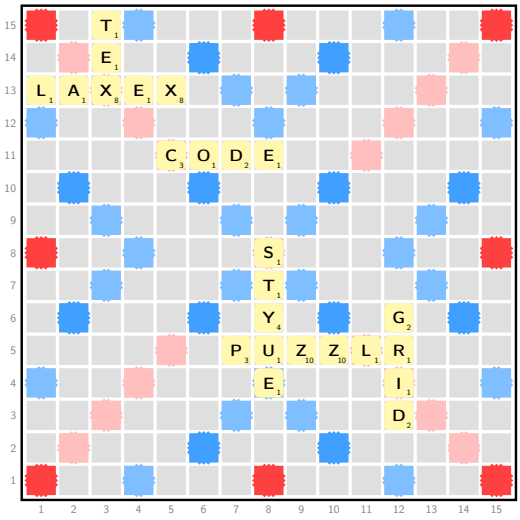
A Word-Game Board

Your Name

August 29, 2026

The ‘Scrabble‘ package provides a standalone board and an environment that overlays words. Coordinates start at the south-west cell; use the optional ‘V‘ argument for a vertical word.



Inline example

The same package can place a word in running text: T E X. Use ‘*‘ for a blank tile and change ‘Lang‘ to ‘FR‘, ‘DE‘, or ‘ES‘ when you want localized tile labels and scoring.
