Acknowledgements

Thank supervisors, funders, and anyone else who supported the work.

Abstract

A concise summary of the thesis's problem, method, and findings, in English.

Kurzfassung

Die deutsche Zusammenfassung der Arbeit kommt hier hin.

Contents

Acknowledgements **1**

Abstract **1**

Kurzfassung **1**

List of Acronyms **5**

1 Introduction **6**

2 Background **7**
2.1 Tables 7
2.2 Code Listings 7
2.3 Algorithms 7

3 Method **8**

4 Evaluation **9**

5 Conclusion **10**

A Supplementary Material **11**

List of Figures

List of Tables

2.1 An example results table 7

List of Acronyms

Acronym	Meaning
CS	Computer Science
API	Application Programming Interface

Chapter 1

Introduction

Motivate the thesis topic and state the research question, then outline how the remaining chapters answer it.

Chapter 2

Background

Cover the prior work and technical background the thesis builds on.

2.1 Tables

Metric	Value
Accuracy	0.94
Latency (ms)	12

Table 2.1: An example results table

2.2 Code Listings

Listing 2.1: An example listing

```
def hello():
    print("Hello, thesis!")
```

2.3 Algorithms

Algorithm 1 An example algorithm

$x \leftarrow 0$
while $x < 10$ **do**
    $x \leftarrow x + 1$
end while

Chapter 3

Method

Describe the approach taken and why it was chosen over alternatives.

Chapter 4

Evaluation

Present the evaluation setup and results, referring back to Table 2.1 where useful.

Chapter 5

Conclusion

Summarise the contribution and outline future work.

Appendix A

Supplementary Material

Additional data, proofs, or configuration details that support the main chapters without interrupting their flow.
